

From Dogma to Light

Scientifically Reveal Your Godself

By Artis E. Hinson

THE STREAM THAT FLOWS AS ART

Born and raised in High Point, North Carolina, until the age of 10, I have questioned religious doctrine from the time that no one could me tell who Cain married. Moving to Greensboro, I excelled in the public schools and graduated with honors while being vice chairman of Greensboro chapter of C. O. R. E. That year 1963, our sit in and sit down (in Market and Elm Street) tactics, led to the first public accommodations law which liberated Greensboro from the outward shackles of racism. Entering Howard University that September, I participated in the original March on Washington. Almost three months later, I was in line passing by President Kennedy's body, as he lay in state at the U. S. Capitol.

Living and learning in a cosmopolitan area of learned scholars, my original question about Cain and a second one [and God said let us make man in our image] continued to elude me. Who is *us*? Upon graduating from college, I sat upon a quest that now is 39 years running. That quest is answering the enigma of religion as well as matter. I now feel that I have the answers, but the difficult part is keeping my business, Body Ecology, viable as a tool of delivery of the mysteries to the chosen individuals (those who choose themselves).

The vision that has led to the creation and evolution of Body Ecology grew out of my trips to Central America, Europe, Asia, and Africa during the late 60's and the early 70's, as well as to Germany and Italy in the late 90's... Realizing that all nations were more closely related to themselves than to the U. S., I saw that the binding support of family was the common thread that unifies all other nations. Their diet is ninety percent vegetable matter; their work is ninety percent of family enterprise; and, their healing is personal balance, based on 99 percent natural earth therapies. Juice extraction, stones, and clay, as well as concentrated plant essences known as essential oils, have been the predominant healing mode since Christ walked, learned, and taught in India. I visited the cave system monastery, Elephanta, where Christ was said to have been initiated before his holy land ministry.

Aloe, Frankincense, Myrrh, Spikenard, Hyssop, and hundreds of other herbs and oils are used by us in routine personal balance which leads to quick relief known as healing. The Bible, the Koran, The Torah, and the Vedas as well as all physicians from Imhotep to those practicing up through the mid 60's used plant based essences to affect healing balance in their patients. As planets and plants have the same root; in the creator's plan (God), healers from Imhotep to Nicholas Culpepper, of the late 1600's, based their healing balance upon the cosmobiology of the patient.

The star map of each person shows that there is no general person that responds in a general way to general chemical medicine as we are today, taught to believe. Same day births are not astrological twins. Astro twins have to be born within 15 miles of each other within a 4 minute period. The charts of most twins vary enough that they are not astrological twins. Lack of balance, uneasiness, or sickness is the result of inner discord from stressful planetary motion. Nothing is constant in the universe except change. Your two handed watch represents the flow relationship between the changing phases of the Moon as it relates to the Sun. Cosmobiology is properly read through the changing relationships of a nine hand dial, representing the exact birth time and place, under the nine planets, stars, asteroids and other bodies and angels in the heavens at the birth scene. Why did the wise men know to deliver gold, frankincense and myrrh to the baby Jesus? These herbs and metal are of Leo qualities, delivered to a Godman, babe born in late August. If Jesus' growth and balance was guided by Magi or wise men, why do people of today resort to psychiatric and physical drug pushers known as doctors. This could only be due to ignorance from lack of exposure

to the truth.

Most people realize that what they possess was wrought through hard labor. So why do you think that you have been “GIVEN” the truth? The one truth which escapes ninety percent of humanity is that the law of love of God within self should be externalized in activity as if the man, woman or animal that you face were as divine as is the God within you. Or, in other words, love your neighbor as yourself.

Over the past 39 years, 18 in the District of Columbia and 21 in Greensboro, we have brought healing balance to thousands of people, including so-called incurables. Our outreach includes many attorneys, doctors, ministers, nurses, professors, and average workers within a hundred mile radius of Greensboro. Yes, these people routinely travel 100 miles or more to get the truth and the healing that they so graciously deserve. We have a client base that stretches all over these United States and have also sent blends to Japan and Africa.

We have helped people off of psychiatric chemicals and have brought healing balance to many through personal karmic readings that do not include the use of herbal potions. Sexual and hormonal balance are routinely administered by us. So the balance of hair growth, weight loss, skin, joint motion, sugar, pressure, detox and pain, are affected in our general daily activity. Seventy percent of my clients were first administered to by the man in the white coat, with the shingle on the wall. They were unsatisfied until they came to me.

Jesus reminded us all that eating life begets life and eating death (cooked food) begets death. We thus provide instruction in an excellent array of live food cuisine. We also stock ethnic clothing, books, candles, ethnic costume jewelry, natural cosmetics, produce, nuts and seeds, grains, general food stuffs, juices, healing video tapes, audio tapes and CD’s. We even had a computer that read your aura (your personal crown of light built from incarnation to incarnation seen only by sensitives) in our downtown store before it burned down in December of 2001.

Search your heart for your personal activity that can help us build your healing-living space on a 200-acre retreat center in southern Virginia. Our mutual healthy and spirit filled future depends upon this new direction in personal growth. Join us to celebrate and elucidate this path on May 26, 2008.

With Love,

Artis E. Hinson

Contents with Outline

Introduction.....	11
I. Humanity’s job is to accept the light of spirit, or the Monad, and joyfully touch all matter of darkness within the realm and to turn it into light and beauty with the ability to record the beautiful responses to its transformative	
II. Those that came were infused with Anunnaki DNA that carried specific instruction to recreate them as specialized slaves to laboriously mine gold to be sent back to Nibiru, to fuel its planetary needs.	
III. In the present time groups of us either work in institutions for the mine or work in the garden	
IV. DNA also proves that the blood of most of humanity was influenced by planetary invasion, except the Native Americans from the Gobi desert who live with physical respect to all environs	
V. Consequently, those that defy nature in bodily maintenance are the greatest fighters and disrespecters of the beauty of humanity and the Earth. Dead diet is the root cause of social deviance. Planetary opening to usher in change for physical an spriritual renewal.	
VI. Run away and come an live in the garden	

Part 1 Our Earth in Physical and Spiritual Growth

From Dogma Overview.....	14
--------------------------	----

I	One must consciously since the divine need and fulfill it through work of inner artistry, to physically bring the working light and body of the Godhead into the garden of Earth.	
II	We grow spiritually through our physical, work of bringing our individual light to the garden of Earth	
III	Our only mission is that of creating vessels through which the consciousness of God can live and work in this Earthly garden.	
Creation Activated.....		16
I.	Image of desire filled with magnetically drawn photons originates as creation manifest. Highest organs of light become the planets.	
II.	Seven spectrums of light creates seven working areas of endeavor whereby a spirit can prove his creative work and bring the unique essence thereof, back to the Godhead which literally expands creation.	
III.	True worship which is only cocreative work for the evolution of love, beauty and joy in the Earthly garden is represented in the history of bibles about sixteen virgin born, martyred world saviors.	
Manifestation from Thought to Form.....		19
I.	Imagination arranges light which becomes the physical template around which creation manifest.	
II.	Our local creative intent must be tested in the heart that the results create only , absolute good.	
III.	The seven colors times the four elements times the twelve aspects of human endeavor plus the soul of the local created universe equal the three hundred sixty four possible expressions of one cosmic day.	
Divine Order.....		20
	The statement as above so below, which is a testament to the fact that man was created in the image of the Creator, is a profound truth that will forever demonstrate itself to us. Our body as well as creation is divided into seven different worlds or states of matter.	
I.	The world of God or the absolute	
II.	Design world of virgin or Archangelic spirits	
III.	Angelic World of divine love intuition	
IV.	World of life spirit, universal thought	
V.	World of the individual life principle	
VI.	Desire world or directed life essence	
VII.	The ethereal physical plane	
Rebirth: The Desire Actualized.....		28
I.	Through active purgation in the discarnate realm, the soul rises to the third heaven to receive concrete instruction as to the possible trials of its next emergence into physical incarnation.	
II.	Only the outline by which one can balance negative karma on his way to becoming God conscious, is shown to the individual who must fill in the detail during his physical incarnation.	
Light.....		32
I	The physical manifestation of seven different bands of light is physically proven in the terrestrial evolution of the physical life wave of Earth. Human is the combination of celestial light with the current highest evolved terrestrial life.	
III.	There is a physical light wave for each created physical body according to its ability to actualize life.	
IV.	Red; mineral growth. Orange; plant, desire acting through attached locomotion. Yellow; personal instinct toward growth through unattached locomotion. Green; universal growth through mind to protect, feed and nurture all. Blue; activation of the science of the growth and reflection of cosmic beauty for absolute joy in creative evolution. Indigo: the all possible active designs of creative evolutionary support of all planetary and universal endeavor Violet; enrichment of the realm through external transformative octivation.	
V.	It has been found that drugs, medicines, light, sound, gem elixirs and flower essences, sensory deprivation and reprogramming all affect the electrical medium of our existence.	
Numerology and the Power of the Rays		32
I.		
Time Defined and Chronicled		35
Astrology The Human Picture.....		38

Life Around Zodiac in Twenty Four Hours..43

An Evolutionary Portal , A Revolutionary Time.....54

I. This door of reorientation allows you to resurrect yourself from the mundanity of the manipulated masses and join a movement of personally supportive ecovillage development enthusiast, who work in mutual support of each other. It is high time that we realize that we should have the faith that our creative work can produce supportive value

II.our task to cleanse our channels of reception that we imbue ourselves with the creative will to live in constantly evolving beauty. It truly is our task to facilitate that "thy kingdom come on Earth" as we envision it to be in heaven. The evolutionary instructions are there, wide open in the cosmic mind, to be read and utilized at all times

III. The food of current humanity has created robotic minded individuals fearful of fellow humanity, environment and death as well as the here after. Thirty percent of our birthing age youth are sterile, ten percent of our babies are autistic, thirty percent of our children lack attentive response, sixty five percent of our adults and thirty percent of our children are obese eighty percent are chronically diseased ninety percent are drug enabled and ninety nine point nine percent kill themselves through their personally destructive environmental practices

IV. Many ask do you believe that. I know because I have the knowledge of published word pictures of my creative flow. Two blatant examples in my business life are my use of the rainbow, which are the symbolism of my rising sign and the symbolism of the birth sign by degree of my natural food trucks shown in print as, "a float moving along a street crowded with cheering people
The Moon, the fastest mover in this stellium represents the present state of ones your emotional security, and is the pointer to ones present state of mood or intuition.
Neptune returns to its present place only every 144 years. The planet Neptune represents spiritual ecstasy, as it brings personal freedom and joy, through music, ritual, merriment and sacrifice. It can also represent an illusionary state induced through drugs and food poisons.
North node is the point where the Moon crosses the celestial equator, which is above the equator of the Earth. The North Node is the point where spiritual intuition helps us develop new purposeful talents. It is like a gift of spiritual consciousness guiding your evolutionary growth.

V. Chiron is an asteroid light giver that travels between Saturn and Uranus taking ones creative presence from mundane to spiritual, to enlightened ideation, to galactical realization. The rainbow bridge of Chiron is the turning point of physical enlightenment that thrust one forward into a new arena of creative growth. It is thought to rule the genome code, stem cell and animal intelligence, test tube reproduction, self animated intelligent robotics, thinking computers and the Internet. It is the reasoning door to the future that closes the past

VI. Gain order in your movement and respect for yourself through critical definition indexed through 20,880 different literary pictures. The symbolism of the liberation of womankind and family at 21 degrees Aquarius is supported in books by Mark Edmond Jones, Dane Rudhyar, David Icke and John Sandbach, to mention a few

Patterns of Rebirth.....83

Today’s Left Brain Maniacal Reptilian Domination.....86

I.

Extra terrestrial control destroyed

our symbiotic balance with nature. The reason for this and all parts of this treatise is to stimulate your drive toward self-sufficiency to stimulate you to become a compassionate god of your immediate plane of physical existence

II. Our life is an experiment and it is up to us to make it work for continued compassionate growth or do it over.

III. For those unfortunate seekers who leave nature's abundance, energized by greed who ban together for the accumulation of stuff, reptilian institutions were created to usurp their energy and turn them into economic slaves.

IV. They even pass laws to redefine medicine as the use of their fake chemical salts and their practice of rendering the body for some proposed good by their terms. For your labor they will sell you dead food, religion, protection, banking and shared ownership of air castle industries. They will sell you their drawn lines known as countries, states, cities and properties as well as your share of the maintenance to keep these slices of Earth in a state of repair deemed sufficient by them. They will sell you conveyance and a permit as well as your share of taxes to use the conveyance. They will also sell you recreation, alcohol and drugs that you can no longer feel nature's pull upon your heart or gather your thoughts to return to her bounteous breast.

V. The Reptiles modeled their Earth inundation program after that which they inflicted upon Mars thousands of years ago world institutional control¹.

1. The Council on Foreign Relations under the Royal Institute of International Affairs, controls the U. S. government and all institutions since 1900 through Rockefeller Foundation financed by the Rothschilds.
2. The five sons of John D. Rockefeller jointly controlled about 4 billion in assets in the 1980's. David backs political and oil influence in the U.S. and Russia as Gorbachev and Yeltsin were under his control. Lawrence Rockefeller controls medical and gaming monopolies. Nelson Rockefeller active in political economics died with involvement in the drug trade. Through influence of his black boyfriend, Winthrop gave generously to black causes.
3. German born Jacob Schiff of Kahn, Loeb & Company followed the Rothschilds' order to fund Rockefeller interest through his National City Bank of Cleveland.
4. The Rothschilds through Kahn, Loeb & Company and J.P. Morgan own 95% of U.S. railroads covering 50,000 miles. Khan, Loeb also was a proxy in Rockefeller ownership of Standard Oil (Exxon).
5. Rockefeller tax exempt interest control educational and religious institutions.
6. William Rockefeller from the middle 1800ths started their medical monopoly by selling petroleum oil as a laxative call Nujol. This was also refined and sold as baby oil.
7. Rothschilds and Rockefeller interlocking financial interest helped set up the central bank, which became the Federal Reserve System as well as the Food and Drug Administration. They backed the Peabody Foundation as this country's first great philanthropists, which later became tax exempt as the Rockefeller Foundation.
8. The Rothschilds set up the world's biggest monopoly in 1925 as a German drug cartel I. G. Farbin, built through the amalgamation of six smaller drug companies was headed by Max Warburg who started the German secret service. Paul Warburg brother of Max headed the U. S. banking system under Woodrow Wilson. Before becoming secretary of state, John Foster Dulles represented I. G. Farbin in the U. S. as American I.G. a major owner of Standard Oil. Arthur Dean, a partner of Dulles

¹ From *Murder By Injection: The Medical Conspiracy Against America* by Eustace Mullins

controlled American Banknote Company, which makes the paper upon which our money is printed.

9. Arthur Dean represented financial influence as director in the Council on Foreign Relations, the Asia Foundation, International House, Carnegie Foundation and the Slone Kettering Cancer Center.
10. In the 1930's Standard Oil received payment in musical instruments for setting up Hitler's military with oil reserves. A partner of Dillon Reed who financed 100,000 in German armament bonds sold in the U. S., known as General William Draper was appointed Economic Czar of Germany after the war.
11. Frank Howard, a director of Standard Oil, helped set up Slone Kettering, which developed and promoted chemotherapy. Dusty Rhodes appointed by Frank Howard to develop chemotherapy, later became head of the U. S. Chemical Warfare during World War II. Howard helped Germany develop synthetic rubber, which was crucial to their war machine. Howard wrote a book called *Buna Rubber*.
12. Hitler's principle bank Schroder-Rockefeller invested in many joint drug and metal companies along with Rockefeller mansions that were spared from the U.S. carpet bombing campaign over Germany toward the end of World War II. After the war the Allied Military Government was set up in I.G. Farben building headquarters building. This one of the largest buildings in Germany was spared from the bombing campaign.
13. Standard Oil Treasurer Charles Pratt gave his mansion in New York to be the first Headquarters of the Counsel on Foreign Relations. Pratt was the grand father of later Secretary of State George P. Schultz.
14. The medical schools were set up and funded by the General Education Fund under the Rockefeller influenced Chase Manhattan Bank. They own the controlling influence in the majority of the nations media companies that they can advertise to their discretion. Through its propaganda, the Rockefeller media got Franklin Roosevelt elected. Of course Roosevelt properly rewarded them with cabinet posts. Rockefeller's religious funding including New York's Trinity Church with a \$50,000,000 portfolio is funded through J. P. Morgan Bank.
15. The Regan campaign and election was their straw man against their communist involvement.
16. Stock Market controlled through National Bureau of Economic Research municipal employees controlled through the Public Administration Clearing House state legislatures controlled by Council of State Governments communist interest fronted through the Institute of Pacific Relations.
17. Under Jimmy Carter David Rockefeller's personal assistant Paul Volker headed the Federal Reserve Board Regan replaced him with Allen Greenspan a J. P. Morgan partner.
18. These reptilian interlocking influences have run through the Bush/Clinton administrations and have gotten suddenly very ugly under George W. as their corrupt schemes put him in office and are giving gross financial windfalls to their cronies while limiting the funding of social and environmental programs.
19. From 1923 until 1942, Prescott Bush, grandfather of the present president along with the Rockefellers, Brown Brothers, Standard Oil, DuPont, and Ford funneled money through bank cartels to finance Hitler's rise to power and his war armaments. A network organized and supported by George H. W. Bush and friends from 1980 until 1990, funneled over five billion dollars to Saddam Hussein, from the Atlanta branch of Banca Nazionale of Italy. Saddam's anthrax program was supplied and funded by Bush involved programs. There is a paper trail between James Baker, George H.W., the Carlyle Group and Halliburton associates that shows funding of joint ventures with the Bin Ladens from as early as the mid 1970's.

beauty supported and protected by those that dwell within the garden. The garden existence was and is today as literal and as physical as you allow it to be through your heart, mind and creative work

- VII. As displaced unhappy people began to threaten the efficiency of production, laws defining movement and possession were set up to control the threatening renegades. Enterprising women came to be with the men and eventually children were born causing the institution of another round of laws to track the responsibility of the progeny of the workers who were of the male gender

Stress: A Problem of Ignorance.....89

Longevity 200 Years and More101

From Death to Immortality; From Darkness to Light.....106

- I. For the more that we seek such as august embodiment of a being to care for us, the less that we will practice the care of attaining inner creative fire.
- II. Ailment and trust issues can be abated through a correctly energized diet. We will understand that individual creativity will replace gainful employment as our talents give us joy while we work. We will understand that even from their youth, our children should be instructed in divine artistic apprenticeship.

Religion, Morals, and Institutional Honor.....110

- I. writing of books of ritual law represented that point in history when humanity lost the memory of its shared social history and practice.
- II. *The World's Sixteen Crucified Saviors* tells the story of these god men and the people that they influenced. The stories of Jesus, Buddha, Krishna, Zoroaster, Quetzalcoatl, and eleven others are well represented
- III. . Computer imaging and carbon dating helps reveal the true age of documents whether written in stone or upon parchment. Space exploration reveals that human type intelligence lived on Mars. Infrared Imaging Satellites revealed the transits of Nibiru, the twelfth planet in 1984 as they continue signaling contacts. The science of genetics reveals the dramatic upgrade in the human constitution, between two and three hundred thousand years ago.
- IV. move to more global initiatives of health preservation through an electric live diet and colon cleansing that less filth be deposited in our environment through the establishment of sustainable living Ecovillages through flora reserves that the planetary lung might be greatly enhanced through the establishment of clean water compounds and a viable delivery system to all of humanity through the establishment of heart felt work in personal creativity rather than the Anunnaki inspired drudge work.
- V.

The Physical Path of the Life Dynamic.....115

- I. We are not the tools of governments or institutions. We are co creators, come to this plain through debt of our past sojourns into mater, or our loving desire to help direct evolutionary growth.
- II. The generator that is the god or mother of our existence is the furnace of light. Light takes form upon our desired request, and returns to the source more greatly expanded, eventually becoming a literal star, through the product of our works of love and beauty.
- III. Through constant unceasing works, one realizes better application of his physical creative hand by which he brings beauty into the earth thereby increasing light
- IV. This canvass, which is literally the crown of light that you either add to, or subtract from resulting from the summary of your activity during each incarnation is easily seen and read by sensitives, until it is totally engulfed by light, as your soul literally becomes a star.
- V. If our creations move from that

which simply satisfies the animal appetite to those creations that increase the beauty, joy and natural viability of the material plain then we start to actualize a third body, the mental body. material is but the cast off or ejaculate of creativity.

- VI. As a flower is the beautiful cast off
of ejaculate material in the rebirth of plants, so are material creations but ejaculate in the constant rebirth of human creative capacity and the quest of human evolution

Part Two Getting on the God Track

Mystique of Love Concerning Sex.....121

- I. mate first there must be numerous points of literal physical congruency in the birth charts. Second the evolutionary growth of the dimensional bodies, which make up our complex lives, must evolve in similarly yearly succession
- II. average man of today is capable of mating only through the first three bodies. These are the physical vehicle, the body of instinct and the emotional vehicle. In general consequence, the relationship is capable of actualizing itself through the expression of physical congress, instinctive desire and tender mutual affection. few people are capable of mating on the intellectual plane.
- III. Mating on the first plane is the interlocking activity of the sex organs. On the second plane a mutually received inflammation of desire defines the mating act. On the third plane mutual emotional sympathy brings about the consummation of mating while on the forth plane such is accomplished through conscious mutual interest. Intellectual sympathy is the mark of fifth plane mating while sixth plane mating is the sharing of spiritual ideals.
- IV. In partnership, first plane attraction is through opposite, man and woman. Upon the second plane like arousal of mutual passion and emotion creates attraction. Opposites attract on the third plane as those who have a great abundance of love to give are attracted to those in need of the gift. Upon the forth and mental plane, those who are interested in the same subjects find true attraction. Upon the higher plane of abstract reasoning opposites support one another in proper checks and balances. On the sixth plane of design mutual number and ray types create concrete affection.
- V. physical body is complete at birth, the emotional desire body becomes active during puberty. The body of tender affections is active by late teens while the concrete mental body is activated by the late twenties. The higher mind comes into activity during the early forties while the spiritual mind unfolds around the early fifties.
